## Introduction

The following wordlists were first published by the Institute of African Studies, University of Ibadan in 1967. Kay Williamson had them typed into a Macintosh system in the 1990s and they languished there until her death in 2005. I have now converted them into Unicode and added new words based on Kay's original annotated copy of the list. The introductory material is presently lacking but it is being rewritten extensively as well as being retyped in order to take into account all the new work on these languages published since 1967. There may well be a few conversion errors, since the electronic manuscript was a mixture of phonetic fonts. Please bring to my attention any obvious errors.
